

IN THE CLAIMS

Please amend the claims as follows:

Claim 1 (Original): A blood fluidity-improving agent, comprising as an active ingredient one or more ingredients selected from the group consisting of chlorogenic acids, caffeic acids, ferulic acids and pharmaceutically acceptable salts of these acids.

Claim 2 (Original): The blood fluidity-improving agent according to claim 1, wherein said one or more ingredients selected from the group consisting of chlorogenic acids, caffeic acids, ferulic acids and pharmaceutically acceptable salts of these acids are contained in a quantity ranging from about 0.01 to about 80 wt%.

Claim 3 (Original): A blood circulation promoter, comprising as an active ingredient one or more ingredients selected from the group consisting of chlorogenic acids, caffeic acids, and pharmaceutically acceptable salts of these acids.

Claim 4 (Original): The blood circulation promoter according to claim 2, wherein said one or more ingredients selected from the group consisting of chlorogenic acids, caffeic acids, and pharmaceutically acceptable salts of these acids is contained in a quantity ranging from about 0.01 to about 80 wt%.

Claim 5 (Original): A body coldness-improving agent, comprising as an active ingredient one or more ingredients selected from the group consisting of chlorogenic acids, caffeic acids, ferulic acids and pharmaceutically acceptable salts of these acids.

Claim 6 (Original): The body temperature decrease-improving agent, comprising as an active ingredient one or more ingredients selected from the group consisting of chlorogenic acids, caffeic acids, ferulic acids and pharmaceutically acceptable salts of these acids.

Claim 7 (Original): A cerebrovascular disease-improving agent, comprising as an active ingredient one or more ingredients selected from the group consisting of chlorogenic acids, caffeic acids, and pharmaceutically acceptable salts of these acids.

Claim 8 (Original): The cerebrovascular disease-improving agent according to claim 7, wherein said one or more ingredients selected from the group consisting of chlorogenic acids, caffeic acids, and pharmaceutically acceptable salts of these acids are contained in a quantity ranging from about 0.01 to about 80 wt%.

Claim 9 (Original): Use of one or more ingredients selected from the group consisting of chlorogenic acids, caffeic acids, ferulic acids and pharmaceutically acceptable salts of these acids for the manufacture of a blood fluidity-improving agent.

Claim 10 (Original): The use according to claim 9, wherein said one or more ingredients selected from the group consisting of chlorogenic acids, caffeic acids, ferulic acids and pharmaceutically acceptable salts of these acids are contained in a quantity ranging from about 0.01 to about 80 wt%.

Claim 11 (Original): Use of one or more ingredients selected from the group consisting of chlorogenic acids, caffeic acids, and pharmaceutically acceptable salts of these acids for the manufacture of a blood circulation promoter.

Claim 12 (Original): The use according to claim 11, wherein said one or more ingredients selected from the group consisting of chlorogenic acids, caffeic acids, and pharmaceutically acceptable salts of these acids is contained in a quantity ranging from about 0.01 to about 80 wt%.

Claim 13 (Original): Use of one or more ingredients selected from the group consisting of chlorogenic acids, caffeic acids, ferulic acids and pharmaceutically acceptable salts of these acids for the manufacture of a body coldness-improving agent.

Claim 14 (Original): Use of one or more ingredients selected from the group consisting of chlorogenic acids, caffeic acids, ferulic acids and pharmaceutically acceptable salts of these acids for the manufacture of a body temperature decrease-improving agent.

Claim 15 (Original): The use of one or more ingredients selected from the group consisting of chlorogenic acids, caffeic acids, and pharmaceutically acceptable salts of these acids for the manufacture of a cerebrovascular disease-improving agent.

Claim 16 (Original): The use according to claim 15, wherein said one or more ingredients selected from the group consisting of chlorogenic acids, caffeic acids, and

pharmaceutically acceptable salts of these acids is contained in a quantity ranging from about 0.01 to about 80 wt%.

Claim 17 (Original): A method of improving the blood fluidity, comprising administering an effective dose of one or more ingredients selected from the group consisting of chlorogenic acids, caffeic acids, ferulic acids and pharmaceutically acceptable salts of these acids.

Claim 18 (Original): The method of improving the blood fluidity according to claim 17, wherein said one or more ingredients selected from the group consisting of chlorogenic acids, caffeic acids, ferulic acids and pharmaceutically acceptable salts of these acids are administered in a daily dose ranging from about 10 mg to about 10 g.

Claim 19 (Original): A method of promoting the blood circulation, comprising administering an effective dose of one or more ingredients selected from the group consisting of chlorogenic acids, caffeic acids, and pharmaceutically acceptable salts of these acids.

Claim 20 (Original): The method of promoting the blood circulation according to claim 19, wherein said one or more ingredients selected from the group consisting of chlorogenic acids, caffeic acids, and pharmaceutically acceptable salts of these acids are administered in a daily dose ranging from about 10 mg to about 10 g.

Claim 21 (Original): A method of improving the body coldness, comprising administering an effective dose of one or more ingredients selected from the group consisting

of chlorogenic acids, caffeic acids, ferulic acids and pharmaceutically acceptable salts of these acids.

Claim 22 (Original): A method of improving the body temperature decrease, comprising administering an effective dose of one or more ingredients selected from the group consisting of chlorogenic acids, caffeic acids, ferulic acids and pharmaceutically acceptable salts of these acids.

Claim 23 (Original): A method of improving the cerebrovascular disease, comprising administering an effective dose of one or more ingredients selected from the group consisting of chlorogenic acids, caffeic acids, and pharmaceutically acceptable salts of these acids.

Claim 24 (Original): The method of improving the cerebrovascular disease according to claim 23, wherein said one or more ingredients selected from the group consisting of chlorogenic acids, caffeic acids, and pharmaceutically acceptable salts of these acids are administered in a daily dose ranging from about 10 mg to about 10 g.

Claim 25 (New): A blood fluidity-improving agent according to claim 1, wherein the sole active ingredient is chlorogenic acid and its pharmaceutically acceptable salts thereof.
